SUMMARY

Data Analyst with 2+ years of experience translating large-scale financial and operational datasets into decisions using SQL, Python, and Power BI. Builds end-to-end analytical workflows — from ETL pipelines and data models to statistical testing and executive dashboards — across datasets ranging from 50K to 450M+ records.

EXPERIENCE

Research Analyst – iConsult | iSchool - Syracuse University, Syracuse, NY

June 2026 - Present

- Architected Python and Polars pipelines to process 3 multi-platform event datasets, eliminating manual reporting prep.
- Deployed Python validation components to enforce schema consistency, data lineage, and governance rules across 3 pipelines.
- Benchmarked 15+ quantitative reasoning models via a Python lineage harness to identify optimal model configurations.
- Formulated statistical metrics to detect behavioral anomalies and neutralize drift across 3 production dashboards.

System Engineer - Data and Reporting Analytics | Tata Consultancy Services, Mumbai, India

July 2022 - July 2024

- Queried 450M+ financial records using SQL window functions and CTEs to extract compliance summaries for audit reporting.
- Diagnosed 85+ data quality issues using Python validation logic, improving downstream reporting reliability by 40%.
- Streamlined ETL workflows using Python to replace manual processing tasks and accelerate report delivery by 50%.
- Designed data models mapping 4 compliance pipeline stages to accelerate cross-functional engineering team delivery by 15%.

ADDITIONAL EXPERIENCE

Data Analytics and Pipeline Engineer | JMA Wireless, Syracuse, NY

August 2025 - December 2025

- Analyzed 50K+ manufacturing records using SQL and Python to map yield trends, isolate bottlenecks, and surface root causes.
- Identified a 47.75% first-pass failure rate across product families via SQL segmentation to prioritize operational fixes.
- Executed ANOVA and chi-square tests revealing significant performance variances across 3 manufacturing conditions.

PROJECTS

Retail Banking Customer Analytics Platform | SQL, Python, R, Tableau, A/B Testing, Cohort Frameworks

[GitHub](#)

- Quantified a \$34,348 LTV gap across 36 segments via cohort analysis and SQL to identify high-value acquisition profiles.
- Proved a 52% higher default rate in cash loans using chi-square tests to inform credit policies for 307K applicants.

Financial Fraud Detection Analytics | Python, SQL, PostgreSQL, Docker, Feature Engineering, Z-Scores

[GitHub](#)

- Investigated 590K+ transactions using Python and SQL to uncover \$3.08M risk exposure across three high-risk segments.
- Engineered 6 fraud signal features — velocity ratios, z-scores, frequency patterns — to strengthen risk scoring precision.

Supply Chain Intelligence Platform | Snowflake, dbt, Prophet, Demand Forecasting, Star Schema Modeling

[GitHub](#)

- Constructed a Snowflake star schema and dbt ETL pipeline ingesting 180,519 orders to enable real-time demand reporting.
- Built a Prophet demand forecasting model achieving a 0.6% MAPE validated through non-parametric statistical testing.

TECHNICAL SKILLS

- | | |
|--|--|
| • Programming and Analytics: | SQL (Window Functions, CTEs, Subqueries), Python, R, Pandas, Polars, PySpark |
| • Visualization and Reporting: | Power BI (DAX, Power Query, Data Modeling), Tableau, Excel Dashboards, Matplotlib, Plotly |
| • Analytics Methods: | A/B Testing, Cohort Analysis, Regression, Forecasting, Feature Engineering, Hypothesis Testing |
| • Data Engineering and Pipelines: | dbt, Snowflake, Airflow, ETL Pipeline Development, Star Schema Modeling, Data Validation |
| • Databases and Tools: | PostgreSQL, Excel (Pivot Tables, Power Query, Advanced Formulas), AWS (S3, Redshift), Git |

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

[Credential](#) June 2026

EDUCATION

Syracuse University | Master of Science in Applied Data Science (GPA: 3.9)

August 2024 - May 2026

University of Mumbai | Bachelor of Engineering in Information Technology

June 2018 - May 2022
